Seal Rock Water District

The State of Oregon Health Authority, Drinking Water Program recently recognized Seal Rock Water District as an “Outstanding Performer”.

The Drinking Water Program (DWP) has identified criteria for determining whether a Community Public Water System should be considered to have outstanding performance. This designation is given to systems at the completion of a Water System Survey. A water system survey is an on-site in-depth evaluation of system sources, treatment, storage facilities, distribution system, operation and maintenance procedures, monitoring procedures, and management, for the purpose of evaluating the system’s capability of providing safe reliable drinking water to the community. The District received this recognition with a certificate from the State of Oregon Health Authority.

For those interested in more details regarding this significant achievement please visit the State’s website at <http://healthoregon.org/dwp> or contact Seal Rock Water District @ 541-563-3529
